The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).</p>

 <p>Martin J. Angebranndt Primary Examiner Art Unit: 1756</p>			

Continuation of 11. does NOT place the application in condition for allowance because: The amendment has not been entered. If the amendment was entered, the recording layer composition limitations would be considered as product by process limitations and not required process steps and the claims are directed to the process of recording not the process of making the medium and recording information on it. The amendment to the specification also is considered new matter as it seeks to modify the meaning of "mono-dispersed" as originally filed. If this amendment is resubmitted, the applicant should NOT include the amendment to the specification. It would warrant a new matter objection to the specification. The newly presented claims include a limitation on the coefficient of variation on the particle size which was not previously recited in the claims. The examiner notes that the applicant relies upon the same portion of the specification for support that they are attempting to amend. The AgInSbTe and InSeTIC are the compositions for the nanoparticles asserted by the examiner and the use of sol-gel processing to make phase change recording layers is taught by Kunugi et al. 62-125550, not a sputtering technique. The rejections stand.
